Title:

Comments: The following USFS properties pose high fire danger to our residences and in essence the community of Plain, due to downed and diseased trees and overgrown understory vegetation. Wildfire on these properties will travel into private forested properties that adjoin and also create soil erosion and silt spilling into the Wenatchee River below threatening water quality, fowl and fish habitat. Please address immediate thinning operations to increase overall forest health. These parcels, approximately 315 acres, span the area between Shugart Flats Road and Beaver Valley Road.

PID: 35169 (12.73 acres)

PID: 35168 (40 acres)

PID: 36571 (262 acres)
