Comments: I just finished scanning the proposal plans and I am very encouraged. This is going to be a fun project to watch unfold. I was happy to see so much acreage under the prescribed fire. The more the better!

There was only one concern and perhaps I missed where it was addressed. My concern was if there would be follow up invasive plant removal and monitoring after the logging is completed. I know that the general soil disturbance that comes along with timber harvest can open up areas to rapid ingress of some non-native plants. Herbicide treatments were mentioned but it seemed unclear as to what their duration was to be and also how they were going to be implemented.

Again, I want to be clear, I am for the logging and the mechanical timber-stand improvements I just want the correct follow up so we can keep this area free of invasive plants as much as possible.

Let's get this project going!!

Thanks
