Comments: I am a 68 year resident of the Westcreek area and concerned by the use of the National Forest in this area. The first change I have noticed is the noise, trash, and traffic generated by the Turkey Tracks shooting area. My family and neighbors are responsible for cleaning up trash along Highway 67. We have found a huge increase in the trash in the area of the shooting range. Along with the traffic at the shooting range, Westcreek has become the number 1 destination for all the off road racers along the front range. The traffic on Westcreek road has become insane. The noise from gunfire and ATV use has damaged our lives to a concerning degree! The Forest Service has encouraged very destructive use of the forests in this area.
