Comments: I was stunned to learn that the USFS has made a deal with Mt. Hood Meadows that puts land and wildlife on the north side of Mt. Hood at risk, after decades of negotiations that would allow for a more equitable exchange. It's incomprehensible to me how such a deal could be made when it is not in the public interest and when it makes little economic sense as well.

I STRONGLY PROTEST the fact that this deal was made, and ask that you review the matter and have the decision reversed.
