Comments: I read about the land in Government Camp area being valued for swap to Mt. Hood Meadowsmtg - by a ridiculous out-of-state, incompetent appraiser who valued it a low value, so low as to be fraudulent, \$26K per acre - which is roughly a 90% discount vs FMV for highly desirable Gov't Camp! WTF !?

I want the Congressional-guided, good faith, fair, correctly-valued "Clean Sweep" trade because it offers incredible public benefits:

1,700 acres of new Wilderness in the Tilly Jane-Cloud Cap Historic District

Special protections for 2,000 acres in Crystal Springs Watershed - the drinking water supply for 25% of Hood River homes AND I LIVE IN HOOD RIVER and drink that water damit.

A win-win solution that ends a 40-year fight over Mt. Hood Meadows' plans to develop a destination resort at Cooper Spur.

Fix this!! for public benefit. Not to unfairly enrich Mt Meadows owners.
