Comments: As a resident of Hood River, I know I speak for many of my friends, neighbors and family, we need to preserve and provide permanent protection to the north side of Mt Hood.

If you would spend time in and around the proposed development area, you would understand the public benefit it provides. It does not take long to appreciate this national treasure and to add a resort would be devastating.

David Attenborough's documentary, "Our Planet", https://youtube.com/playlist?list=PLz58QJ68R9CSw5YUr1oAjD9dXDj8qbkRwprovides information necessary to considered when developing forests land. A responsible developer of these lands needs to be accountable for their actions on how they are changing the planet. We all have an influence on what the planet will look like tomorrow. Being responsible, watch Attenborough's entire documentary and think about the world you want to give your children, grandchildren and your great grandchildren. In good conscience, one would not develop the north side of Mt Hood to join the effort for a better planet.

Thank you
