Comments: To whom it may concern:

I would like to thank the US Forest Service for your efforts in facilitating this dynamic land exchange. Your stewardship to providing public access to forest lands is appreciated and direly needed.

I am writing to object to the objection surrounding the appraisal. Two acts of Congress and two fully validated appraisals will never satisfy certain activist groups.

Please continue forward with the Land Exchange that will provide recreational and forest access to the public. The Land Exchange will benefit MANY and certainly the majority, we cannot appease combative activists that are concerned with personal preference and gain.

Thank you.
