Comments: We live in the Harris Park area. If the Harris Park gun range is chosen we are concerned about the height number of people that would be coming here to shoot. We are a highly populated area and it already feels dangerous at times to take kids and animals out on our local trails. People do not respect the neighborhood and there has never been designated shooting times. We are concerned about property values going down, noise pollution, heavy traffic in a confined area and people shooting outside the designated areas. We hope that the number of people that choose to live here away from the noise and population of the city will be taken in to account. Harris Park is not an appropriate place to have a gun range.
