Comments: Alaska Roadless Rulemaking #54511

Is there any place in this world that our children can go that is not touched by man? Destroyed by man? We need this Forest to breathe! Don't you realize that we need these trees in order to live. It is unbelievable that you are not considering the environmental impact you will have when you destroy our forest! Who are you people? How in the world can you considered destroying our beautiful Forest. For the love of God oh, for the love of our children and for the love of our children's children please do not touch Tongass!
