Comments: Alaska Roadless Rulemaking #54511

As the nation stands divided, I urge whom ever is reading this to put aside politics and instead focus on the mission of the EPA. To protect the environment, allowing this logging is not upholding this mission. I am urging you as a fellow human being, to agree with scientists and not continue to pursue endeavors that worsen the climate crisis for profit. Please. I want to have a nice life like you may have lived, I want to raise kids knowing they'll be safe from horrible fires and storms but right now I don't think that's possible. Please make a world you, my children and myself can live in. Be on the right side of history and science.
Thank you for your time.

Sincerely,

Seanna Shutta-Morgan
