Comments: Alaska Roadless Rulemaking #54511

My name is Christopher Giancaspro and the reason I am emailing you is because I want to protect the Tongass National Forest. I beg you to please don't gut the protections for this forest it is the lungs of America and the home to bald eagle the animal that is the symbol of this country. There are natives that also live in that forest that disapprove of what is going on and demand the protection of the forest stays.
