Comments: Alaska Roadless Rulemaking #54511

My Name is Seger Ott-Rudolph, a 13 year old kid who is fighting for our environment. I should not have too. Environmental protection should be mandatory. I recently found out about the Trump Administrations plant to repeal the Roadless Rule act in the Tongass national forests and never have I been so scared for the world. This is such a step in the wrong direction and changes need to be made. I, along with many others demand that you put an immediate halt to the rollbacks on the Roadless Rule in the next 30 days before the record of decision. This is not only a threat to me, but to indigenous people and to nature. I demand that you think more about the effects these decisions have on the environment more than the money they make. I want to live on a healthy planet, and you are slowly taking that away from me. What a shame.
