Comments: Tongass Forest destruction Trump Administration

This must be stopped. The forest is one of our last legs against Climate change, and our current Liar in Chief wants us to take down more than half of it, when the forest itself absorbs about 1/10th of the carbon from the mid us alone. Not to mention all the natural habitats they'd be destroying with their logging excavation. Completely unacceptable. Logging accounts for 1% of jobs, when fishing and tourism counts for 25%. Tearing this forest down would LOSE more jobs than it creates, and it will destroy multiple habitats for both land and aquatic creatures.

Stop Trump before he kills those he hasn't killed by ignoring the Corona Virus.
