Comments: Alaska Roadless Rulemaking #54511

Please do Not allow logging and drilling in our precious Tongas national forest! If you don't I and many others will drop what we're doing to put our bodies on the line to fight to protect it. We cannot allow this to move forward. This place is sacred to millions of people around the world and is one of the last pristine places on earth! It is absurd to even think about touching it!!!
