Title:

Comments: Yes, yes, yes. These upgrades are wonderful. The existing 3 person fixed grip lift limits folks getting to the top and feeding the Zumba lift and The Beavers Lift.

Also the 3 person lift is rare and confuses folks that it's not a 4 person. I've seen the lift have to stop because the 4th person tries to load anyway.

The warming area would be nice for folks since Black Mountain lodge is about 11,400 feet in altitude and it gets very cold and windy there since it's so close to the tree line.

And the barbecue at Abasin is wonderful AND affordable compared to Fare at other resorts,

Please approve and make this happen.
