Title: Founder

Comments: I too am in agreement with closing shooting in certain areas of the forest for the obvious reasons of safety.

However, I this be done with the stipulation that no closures be done until AFTER the provided shooting ranges are built in operational.

Sad to say, I've been involved with the government's promise to build ranges before and they never came through. One example was the closure of Table Mountain Gun Club in the late 1980s. Jefferson County promised that a public range would be built but to this very day that range has not even been planed.
