Comments: Comments on project 57807:

-- Many of the conditions described in Table 3 under "Conditions based adaptive management of target shooting" currently exist including shooting at night, trash, etc based upon personal experience.

-- How will you implement Management Action to "Increase patrols of the area by law enforcement or forest protection officers" Increased patrols does not currently help us. We are understaffed for law enforcement as it is. Please advise - it appears you will not be able to support this action.

-- Numerous "Indicator measures" described in Table 3 of the "INTEGRATED MANAGEMENT OF TARGET SHOOTING ON THE PIKE NATIONAL FOREST" document require the presence or at least frequent site patrols of enforcement Officers to identify when those Indicators are present. Very unclear how this will be further managed in the future.

-- Fires. There is a strong history of fires in this area - many of them originating at the range. Expansion of the current range with the current structure seems like a recipe for a large fire.
