Comments: Dear USDA

My family owns a vacation home on the North side of Mt Hood. It should not be there, because that side of the mountain should be reserved for wilderness, forest resource, day use recreation and camping only. But since it is there, I am all the more aware of the negative impacts of human activities on the mountain. I do not support further development of ski or recreation areas, parking or lodging on that side of the mountain. I do support the CleanSweep land swap that has been in the works for several decades. The under-valuation of the Government Campproperty is not realistic, given its potential for development, while the over-valuation of the property owned by Mt Hood Meadows, above Highway 35, is only because there is an assumption that development there would eventually be allowed. Which we are pledged to prevent.

Please consider this as my support for you to renegotiate the deal.
