Title:

Comments: I would encourage everyone NOT to go forward with this plan. I don't believe a national forest needs attractions other than wilderness and trails itself--I don't see the point of this project in a wilderness area. Also, this will increase traffic up what is already a narrow and twisting road, and I don't believe the road can handle it, nor would the neighborhoods that live along the Crest road. Please do NOT go forward with this project. We residents of the East Mountains don't need this.
