Title:

Comments: I would be for a roller coaster if human beings were able to respect being out more, since Covid there has been a huge increase of people being in nature, which is good, but they also do not pick up after themselves. Huge increase of younger adults too have been driving the crest rd like they are in the movie Fast and Furious: Tokyo Drift. I have also seen many individuals going up to the ski area during closed hours, jumping or going over the barricade, And I feel if a roller coaster is to be put there that these same people would continue to do the same thing due to the roller coaster.

I feel an Alpine Slide would be a better fit for our ski area than a roller coaster, the roller coaster would cost more to build and maintain, including cause more habitat loss to the environment, and if younger kids happen to trespass after hours less likely of them causing as much damage to an alpine slide than a roller coaster, and they wouldn't be nearly as hurt or possible death due to the height of one. To me it's a good idea to put in an attraction to bring in some more revenue, but I do not think a roller coaster would be the ideal attraction at the ski area, to me an Alpine slide is more suitable, less destructive on the habitat, and less cost to build, liability, and maintenance. Not only that more can enjoy an Alpine slide than a roller coaster.

Thank you for your time ,

Nicole Leeper
