Comments: I just wish to entreat the finalizers of this project to be sure to hold to the needed protections for our local trails. Rerouting and buffers for the trails are both necessary and expected. Local bike club and forest representatives have put years of labor and expense into creating trails that have no nearby equals. I would hate to see that work lost to future users. The Boggy trail system is a driver for local business and a negative outcome would be difficult to handle for them. This sounds like a good project and is much needed but lets be sure not to throw out the baby with the bathwater.
