First name: Michael

Last name: Sanchez

Organization:

Title:

Comments: I think this will adversely affect the mountain existence (serenity and wildlife habitat). There is already too much encroachment by hikers, ski operations and general enthusiasts leaving trash and other forms of debris not to mention homebuilding, road construction/maintenance etc.

As a lifelong resident of Albuquerque I am totally against this project and any further commercial (non natural) development on the mountain. Sandia is not that big of a mountain to support this ongoing development, what I have heard is what other support operations (retail etc.) will be required if this is allowed to proceed.
