Comments: hello , i really can't believe of all the ways to spend money on the mtn this is the best they could come up with.

This does nothing to help children. It does not do anything for the health of anyone riding the coaster. It will not build any community.

We have a large mountain bike community already in place. People drive long distances year round to ride bicycles in the abq area. More would come if a bike park was built instead of a coaster. I also believe a bike park would bring more jobs and money to the community. Look at Angel fire bike park for one example. Also the disruption of the enviroment and the landscape is a concern. Has an enviromental impact study been completed??Thanks
