Comments: We already have an attraction in ABQ - the beautiful Sandia Mountains. Why spoil the view with 4,000 feet of Coaster track? Has an environmental impact study been done on the terrain? Build, build, build - money, money, money. There are plenty of other ways to make buck rather than destroying the natural beauty of our environment. Have enjoyed hiking and taking photos in the Sandias for more than 20 years. This proposed coaster project is NOT necessary!
