Comments: Greetings,

I am against the proposed "mountain rollercoaster." I am an avid runner and hiker. I grew up running in these mountains. I believe the coaster will create larger amounts of litter and trash from visitors that are not there to enjoy nature but instead go to an amusement park. The coaster will also create large amounts of noise that will disturb people and wildlife. I have been to coasters like these and they do not promote a connection to their environment but instead are tourist traps. Increased use of the mountain by tourists will only drive the locals off and rob them of their connections to nature. I will gladly pay more service fees to protect our Forrest from cheap thrills.

Thank you,  
Chris Bratton
