Comments: I am submitting my input for the proposed mountain coaster project at Sandia Ski Area.

Sandia Ski Area is a wonderful place to expand into other outdoor activities. The snow totals in past years do not support the ski only area.

In regards the the mountain coaster, this would absolutely generate much needed revenue. Has a mountain bike park been considered? There is such an extensive mountain biking community here in New Mexico that would benefit from having a lift supported area so close to the metro. People passing through would take advantage also. With Angel Fire so successful this would be a great addition and destination state for Mountain bike enthusiasts from all over. We frequent the ski area in the summer and ride there at least one day a weekend, with lift service and new trails there would be opportunities for all levels of riders to enjoy the space. The revenue produced would great.
