Comments: I have hiked my entire life in the Sandia mountains. They deserve better than to have a noisy roller coaster affecting wildlife, residents, and the environment with noise that will carry for miles. This disturbs people's right to escape to wilderness and have solitude. The noise does not respect the wilderness boundary. The community job benefit is negligible. This seems like a way to benefit the owners of the ski area at the expense of local resident's needs and desires. Please do not turn our mountain into an amusement park. We have enough traffic and wildfire concerns as it is without adding sparks.
