First name: rosa

Last name: harper

Organization:

Title:

Comments: I urge the Forest Service to conduct an environmental impact study of this project. The Sandia Pueblo people should also be consulted as this is a sacred site. Building a rollercoaster on top of this still pristine land will create pollution, impact plant and animal life, and disturb the peace of this place which is a refuge from the city for so many that live here, myself included.

Please prioritize the honor of this beautiful place over the desire for profit.
