First name: Timothy

Last name: Mast

Organization:

Title:

Comments: We strive to eat and produce natural and organic food and believe that it's the people's responsibility to care for God's creation. I don't have enough information about this Gypsy Moth treatment to know what is being used to kill them, but we are adamantly opposed to the use of glyphosate or other toxic chemicals on public lands and especially on lands close enough to our own to have a negative effect on our gardens and fields. Please reconsider the longterm impact your sprays could have on our forests.
