Comments: I oppose to this proposed project. The noise pollution that this would cause on the mountain will be harmful to wildlife and visitors. Hikers come from all over the southwest to enjoy the Sandias and it's proximity to Albuquerque. The constant noise of a roller coaster throughout the mountain all day would destroy the solitude that many see as a particular joy of this mountain range. This roller coaster will send visitors to Santa Fe instead to enjoy the beauty of our region and take away resources from Albuquerque. It will also alienate residents from enjoying their backyard. Lastly, I have no doubt it will negatively impact the quality of life of the permanent wildlife residents of the mountain. Please don't do this. How awful.
