Comments: Thank you for considering public opinion on the Mountain Coaster at Sandia Peak. As a resident of Albuquerque in my mid 30's, I am in support of this project for a number of reasons. I believe this type of attraction not only will give locals recreational entertainment but would entice tourists to visit and stay longer. Our businesses need the trade more now than ever and would serve as a great attraction during our city's main events such as Balloon Fiesta and State Fairs. We should be building the city to leave a strong economic system for generations to come. Projects like this help the city diversify revenue. I believe this also helps with the perceived value of living here, developing here, investing in Albuquerque, etc. I'd like to also mention that this type of project often coincides well with a water park which I would be in full support of. Feel free to contact me with any questions. Thank you.
