Comments: This is a great idea --- but I believe you are missing the point on how this should run, and how long it should be..

You have it seemingly running from the top of the peak down to maybe a halfway part of the ski hill. This means 'evidently' you'd expect most people to have to come up the tram, or drive over to the peak parking lot and walk in??? Or come up a chair lift from the ski base area??

No- this item should start from the ski area base --

- Has way more parking.

--People from ABQ more likely to go (i'm not buying a tram ticket for this -- don't even try that game).

-- Many more people will go -- if they don't have to ride a chair lift just to get to it.

-- If you want people to go to it from the Tram -- they can ride the chair lift down to the ski base area first.

If my point hasn't been proven already --- see the video from the coaster that comes out of the base area at Purgatory.
