Comments: I am opposed to the "Mountain Coaster".

The Forest services own mission states,

"To sustain the health, diversity,
and productivity of the Nation's
forests and grasslands to meet
the needs of present and future
generations."

Does a "mountain Coaster" help the health and diversity our national forest? I don't think so. Does a "mountain coaster" help the needs of our current generation? I don't think so. People living in Albuquerque can not get away from the hustle and bustle of city traffic and noise inside of Albuquerque. They can however escape to the peaceful wilderness of the Sandia's which should not include people screaming as they ride a "mountain coaster." Does a mountain coaster help future generations? I do not think so. The carbon created to create the steel and to pour the cement for the footings will pollute the earth long after the "mountain coaster" is finished.

The coaster helps the operators of the ski resort make more profit. It does not help the Sandia National Forest in any other way.

Please say no.
