Title:

Comments: I disagree with the proposed mountain coaster and concession stand on Sandia Mountain. I do not go to the mountain to hear all the sounds associated with a wooden coaster. I also do not go to the mountain to get concessions. The Sandia Mountains are our most treasured feature of Albuquerque and it does not need to be commercialized. The beauty, the nature sounds, the animals, the trees all need to be preserved. We need to stop developing and start protecting what little of nature and wildlife we have left in our city. It is a beautiful mountain, not an amusement park. I am counting on the forest service to protect these mountains from people who do not care about the mountain and all of its glory but instead care only about themselves and how much they can profit from it. Please stop this project! Thank you.
