Title:

Comments: I would like to urge those considering this project to think of impacts to the East Mountain community. We already see significant unsafe traffic from people in town, especially on snowy weekends with those wanting to come play in the snow. There are also many accidents on the peak road due to high speed and unsafe driving. Ample consideration to additional road upkeep and traffic monitoring/policing should be considered as a part of this project. Additionally, I hope that the benefits of such a project can be extended to other East Mountain businesses.
