Comments: I would just like to say that the National Forests are for the enjoyment of everyone, not just to be limited to nature in its original condition. We have wilderness areas for that. I have personally rode several mountain coasters in Colorado and enjoyed them. I love going to the Sandia's to ski and the addition of this coaster will bring me to the Forest more often to enjoy it for what it was created for. The mountain already has a ski area, which I love very much, so 1 more man made object to bring the National Forests to more people's enjoyment is a great idea. I am in favor of the mountain coaster to help bring more people to enjoy the National forest and its beauty. People that do not actually go to the Sandia's because they don't ski can enjoy the area on a mountain coaster.
