Comments: I am in support of a project like a roller coaster, however I am curious on the environmental impact. Will there be any studies done on the impact the coaster will have on critter breeding? What about the sound levels of the mechanics as well as the riders? Currently when visiting the hiking trails on the east side of the mountains our entire trip is tranquil. I imagine this will change significantly with a coaster full of riders passing by every few minutes. I do feel that this will impact our ability to view as well as listen to nature. I support getting New Mexico residents and visitors out into the forest, but we also need to be aware of the impact that will have on the forest. Not everything should be turned into a profit machine.
