Comments: I support the idea. I understand it is being built on the SUZ, not in untouched wilderness, and that claims of environmental damage are likely unfounded.

In some of the pictures, it looks blue; maybe it should be painted green?

I personally cannot wait for the rollercoaster. These are the types of things the ski area should be building (and maybe replace lift 1 with a gondola).

-Fret not! They say a critical comment represents 100 disgruntled people's opinions, but that satisfied people rarely have reason to comment. Therefore a supportive comment must represent 10,000 opinions.-
