Title:

Comments: I really don't think we should use this coaster idea if it will cause trouble between cutting nature, disrupting the wildlife and ecosystems nor do I agree with tampering more than the ski area. It's my home. My land. So much sentimental value. New Mexico true is about being unique. Not for more because outsiders want and crave what we have. Forgive me for any grammar errors I'm just kind of angry that we would do this after the horribly failed ART project that destroyed many businesses. And this will destroy our homes and ecosystems. It's just not worth the risk in my eyes. If anything we should just open another water park for those rough summers
