Title:

Comments: THE UPPER NOOKSACK RIVER MUST NOT BE LOGGED. It has far more lasting use for its ecosystem values than as timber. Our forests are rapidly shrinking, despite their value as a carbon sink, for their recreational value, and their value as an ecosystem reservoir. Our forests are a valuable asset to all of our citizens and must not be compromised for the profit of a few.

THE UPPER NOOKSACK MUST REMAIN AS IT IS, and NOT LOST TO THE CHAINSAW. This is an irrevocable decision that will greatly affect our region for at least a century. LET'S GET IT RIGHT - NO LOGGING ON THE NOOKSACK.
