Comments: I read about the Sandia Mountain Coaster project in the ABQ Journal this morning, and I looked at the documents on the USFS project webpage, and also the Sandia Peak Ski Area webpage. I see that the project itself will not require rerouting of the 10K Trail. However, the maps on the USFS project webpage do not show where the 10K Trail is located relative to the project (i.e. how close or how far from the project); nor does the ArcGIS page. Could you please show where the 10K Trail is relative to the proposed project on the maps and the ArcGIS page? This information would be helpful for us to make our comments.
