Title:

Comments: My wife and I are retired. We travel to the Cortez/Dolores area annually to mountain bike the wonderful trails there.

We have read the Salter Vegetation Management Project Document, and understand the biologic rationale for it.

We only ask that the loggers try to understand the huge amount of volunteer effort that has gone into building and maintaining the Trail System in the Boggy Draw Area. We would hope that given this understanding, the loggers will abide by the Project Guidelines that require restoring trails to their prior condition very soon (days or weeks, not months or years) after logging is complete in a given area.

We would also hope that as much as logistically possible, bikers and other trail users would not be subject to total closure of the area.

Thank you,
