Last name: Bryan

Organization:

Title:

Comments: I'm concerned about this project as it appears it would severely impact the recreational trail and road system in this area. Not only is this system one of the two main sources of my personal recreation, but it's a considerable draw for mountain bike tourists. As many as half of the people I see on these trails are from outside the Cortez, Dolores, Mancos areas, and many are from several states away. The parking lot is always busy and many people in our community invest tremendous personal energy into upkeep and use of these trails, all within the bounds of the governing agencies.

Damaging this system would seriously impact and potentially ruin a much-loved community resource. Logging could do such damage and be a safety issue besides. Please help preserve this system. Thank you.
