Comments: To whom it may concern. I am writing in regards to the Salter Vegetation project at the Boggy Draw complex near Dolores, Colorado.

I am a resident of Cortez and was a previous resident of Dolores. I am an avid mountain biker and am concerned with the effects of the project on the current trail system at Boggy Draw. While I am aware of the beetle kill issue and the wildfire risk due to the increasing amount of dead trees. While I know there are benefits with the project my big concern is the impact it will have on the trail for up to the next 10 years. Many human-powered hours were spent out there building the 50 plus miles of wonderful single track that exists, and I am concerned about the Salter project going through and tearing up the single track. Should there be considerations as to how the single track can remain open and undamaged then I can put my support behind the project to help with the beetle kill issue and the wildfire mitigation

Thank you,

Chase Wesley
