Comments: I can understand the need to perform vegetation management.

My hope is that in doing this, the forest service will be willing to work with trail management groups to minimize the impact on the trail systems that have been built in the area. Many miles of trail have taken many hours of volunteer hours to build. Many more people spend many more hours enjoying these trails. The boggy draw trailhead is packed on the weekends. The trails are filled with families enjoying the outdoors. I hope that this project does not change that. It would be a shame for the community. It would be a shame for the local businesses that see the benefit of all these people coming together to enjoy the outdoors.
