Title:

Comments: I mountain bike and cross country ski on a regular basis throughout the year on the Boggy Draw trail system. This outdoor recreational activity is an important way for me to maintain my physical and mental health.

I realize that our forests need to be periodically thinned to maintain their health, but I hope you can do this in a way that minimizes the damage and access to the Boggy Draw Trail system. Many bikers and skiers depend on the Boggy Draw for their physical and mental health.

Thanks for your consideration.
