Title:

Comments: I would like to express my objection to the Salter Vegetation Management Project based on the following concerns.

1. The risk of wild fires will be an ever increasing threat as long as global warming continues.
2. The solution to the risk of wild fires surely cannot be to rid our environment of every living tree.
3. Why is there a " all or nothing " approach.
4. I note that the project claims to be selective, yet the Montrose logging company are all ready asking for a variance for bigger roads and bigger trucks.
5. The diversity of the wildlife will suffer.
6. The area is not densely populated so surely we can figure out how to protect them without destroying the whole forest.

Thank you Raiha Paewai
