Comments: The forest should be a place of tranquility, peace, and solitude. John Muir wrote, "Climb the mountains and get their good tidings. Nature's peace will flow into you as sunshine into trees." A coaster does not belong in this setting. Construction and operation will be disruptive to people and wildlife. Unlike the ski lifts, which operate for very limited periods in the winter, this coaster has the potential to have a much greater negative impact. Please do not allow this to happen in the forest.
