Title:

Comments: I believe this will be a great expansion. This ski area's terrain has not been improved upon for a very long time. This is way overdue, along with more thinning of trees and selective trail widening. My family has a long background being employed and interacting with the Forest Service in Arizona, Colorado and New Mexico. Proper management, not neglect, helps improve our public lands. I feel this should be approved as soon as possible.

Thank you,

Justin Jacobs
