Comments: I do not support taking more natural space for human use. In my opinion the actual benefit of having a roller coaster in the Sandia Mountains is more about profit than environment. What is the impact to the animals that call that area home, will it impact the breeding cycles of the native animals. What additional trash will need to be removed from the area, or will it be allowed to blow around for the residents of the east mountains to deal with. My question is who will really benefit from this?
